In response to the Non-final Office Action mailed August 14, 2002, please amend the above-identified patent application as follows:

**IN THE CLAIMS**

1. A compact disc processing system comprising:
- ✓ a printer for printing indicia on a first compact disc;
  - a recorder for recording information on the first compact disc; and
  - a transporter carriage for holding the first compact disc and moving the first compact disc between the recorder and printer, the transporter carriage comprises a single gripping head rotatable about a horizontal axis and having first and second gripping locations each for respectively holding the first and a second compact disc simultaneously, such that the first and second compact discs are held in fixed relative positions coextensive along a common axis in different planes while the first and second compact discs are engaged by the gripping head.
